| How would you like carts to arrive?                         | Standard De                                                                                                           | livery                       | "Fully                 | Assembled" Delivery                   |  |

**"Standard delivery"** - the carts themselves come assembled and only need push handles to be installed (tool included). Accessories are NOT mounted and the customer is responsible for accessory assembly.

**"Fully Assembled Delivery"** - for a small fee (typically \$30-40 per cart) we can pre-mount accessories prior to shipment, providing a "Turn-key" cart solution. Carts arrive ready to roll into service and will arrive shrinkwrapped and on pallets. Additional freight fees may apply so call for freight quote. NOTE: IV poles, Defibrillator shelves, Vertical tilt bin rails, and Shelving units will not be pre-mounted due to increased risk of freight damage.
